Consultation – NHS Future Fit

Dear Sir/Madam

Trefeglwys Community Council wishes to confirm its support for Option 1 as detailed in the NHS Future Fit Consultation.

As a Community which is located over an hour away from a major hospital it is imperative for our Community and its residents that emergency care is available to them as close as possible. Trefeglwys Community Council feels that Option 2 could result in many problems for patients who require emergency care and would have an extra 20 to 30 minutes travelling time to reach it which could be critical in many cases.

Long term, option 1 is the most cost effective and would mean that fewer people have to change which hospital they already use and fewer people would have to travel further for emergency care.

Yours sincerely

Sophie Palmer
Clerk to Trefeglwys Community Council
